Of customer interactions analyzed automatically	Channels unified: voice, CRM, catalogue, email, meetings, social	Auto quotation generation from need analysis	Deal progress & compliance tracking	Leads created in CRM from every conversation

THE CHALLENGE

Blind Quality Assurance
Manual QA reviews only a fraction of interactions — most conversations are never scored, so coaching and quality gaps go undetected.

Compliance Gaps Go Unseen
Script, regulatory and conduct breaches slip through unnoticed across calls, email and chat — risk surfaces only after an audit.

Lost Deal Intelligence
Buying signals, objections and next steps stay trapped in conversations — never reaching the CRM or the pipeline.

Fragmented Customer Channels
Voice, CRM, catalogue, email, meetings and social live in separate silos — no unified view of any customer.

Slow, Manual Quoting
Quotes are built by hand against scattered price lists — slow, error-prone turnaround stalls live deals.

Untargeted Outreach
Campaigns blast the same message to everyone — no intent- or need-based targeting, so response rates stay low.

No Team Performance View
Coaching and rankings run on gut feel, not evidence — top behaviours and skill gaps are never quantified.

Reactive Revenue Risk
No forward view of deals likely to slip — revenue risk surfaces only after it is lost, too late to intervene.

THE SOLUTION

A fully automated revenue-intelligence pipeline unifying Voice, CRM, Catalogue, Email, Meetings and Social. RevSense scores quality and compliance, extracts deal intelligence, auto-generates custom quotations and launches targeted campaigns — turning every customer interaction into Executive, Team, Revenue and Training insight.

Omnichannel Capture
Ingests voice, CRM, catalogue, email, meetings and social into one unified customer timeline.

AI QA Scoring
Weighted quality scorecard applied to every interaction across communication, product knowledge and conduct.

Compliance Monitoring
Automated script, regulatory and professional-conduct checks with breach detection on every conversation.

Deal Intelligence
Automatic deal-value calculation using catalogue pricing, probability scoring, risk assessment and next steps.

Need Analysis & Coaching
Structures each customer's needs and turns them into skill-gap identification and training priorities.

CRM Write-Back
Automatic lead and opportunity creation, transcript attachment and product matching into the CRM.

Custom Quotation (CPQ)
Generates and sends customized quotations built on AI need-analysis of each customer conversation.

Targeted Campaigns
Launches targeted outbound campaigns to the right accounts based on intent and deal signals.

Unified Intelligence Layer
Synthesizes six channels into Executive, Team, Revenue and Training insight — one view across the business.

RESULTS DELIVERED

100% Interaction Coverage
Every customer interaction transcribed and scored automatically — zero blir spots.

Real-time Compliance Assurance
Script, regulatory and conduct compliance monitored on every conversation

Exec-ready Executive Summary
Leadership KPIs auto-compiled across all six channels — no manual reportir

Team-wide Team Performance
Evidence-based scorecards and rankings replace gut-feel coaching.

8× Faster Quoting
AI builds and sends custom CPQ quotations in minutes — replacing hours o manual quoting.

+$20M Revenue Insights
Pipeline value, risk and uplift surfaced in real time — turning more conversa into revenue.
